

New 5-year Environmental Plan for Kansai 3 Airports - KIX, ITAMI and KOBE are going greener -

Kansai Airports Group is delighted to announce a new five-year Environmental Plan (2018-2022) to further accelerate its integrated efforts to reduce the environmental footprints at the three airports in the Kansai region: Kansai International Airport (KIX), Osaka International Airport (ITAMI) and Kobe Airport (KOBE).

This five-year plan, covering all three airports, encompasses the following four pillars:

- Response to climate change
- Resource usage
- Harmonious coexistence with the surrounding environment
- Environmental management

Under these pillars, specific strategic goals and tasks are defined to serve as performance indicators for future activities of the group.

Kansai Airports Group is committed to strengthening its efforts to reduce environmental impacts, fulfil its social responsibilities and tackle environmental issues on a local and global scale.

As June is designated as “Environment Month” by the Ministry of Environment, Kansai Airports Group will hold a number of events at the three airports in this month with the aim of promoting environmental awareness in accordance with the Environmental Plan.

- “World Environment Day Digital Stamp Rally”, June 5 to June 11, 2018

Kansai Airports Group will hold an event at all three airports on June 5 to raise awareness on environmental conservation, in line with the World Environment Day events to be held by VINCI Airports Group worldwide. Upon scanning one of the QR codes at several spots scattered throughout the airport, customers will be prompted with a quiz to win a digital stamp. If customers collect all the stamps, they will win Kansai Airports Group’s original eco-bag as a prize. One round of the stamp rally need to be completed within one airport.

- “Stop Engine Idling Campaign”, June 20 (KOBE), June 21 (KIX) and June 22 (ITAMI)

As an annual event involving Kansai Airports Group employees together with airport operators, we will encourage drivers to switch off the engine when their vehicles are not running. This will be the first year in which all three airports together, including KOBE, are to engage in this campaign.

- “Clean Up Campaign”, May 30 to June 13, 2018

During the campaign period, Kansai Airports Group will call on airport business operators at the three airports to actively clean the areas around their business establishments.

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport (“KIX”) and Osaka International Airport (“ITAMI”) from New Kansai International Airport Company (“NKIAC”) and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports’ wholly-owned subsidiary, took over the operations of Kobe Airport (“KOBE”) from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of “One Kansai Airports Group”, Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.

New 5-year Environmental Plan

- Summary -

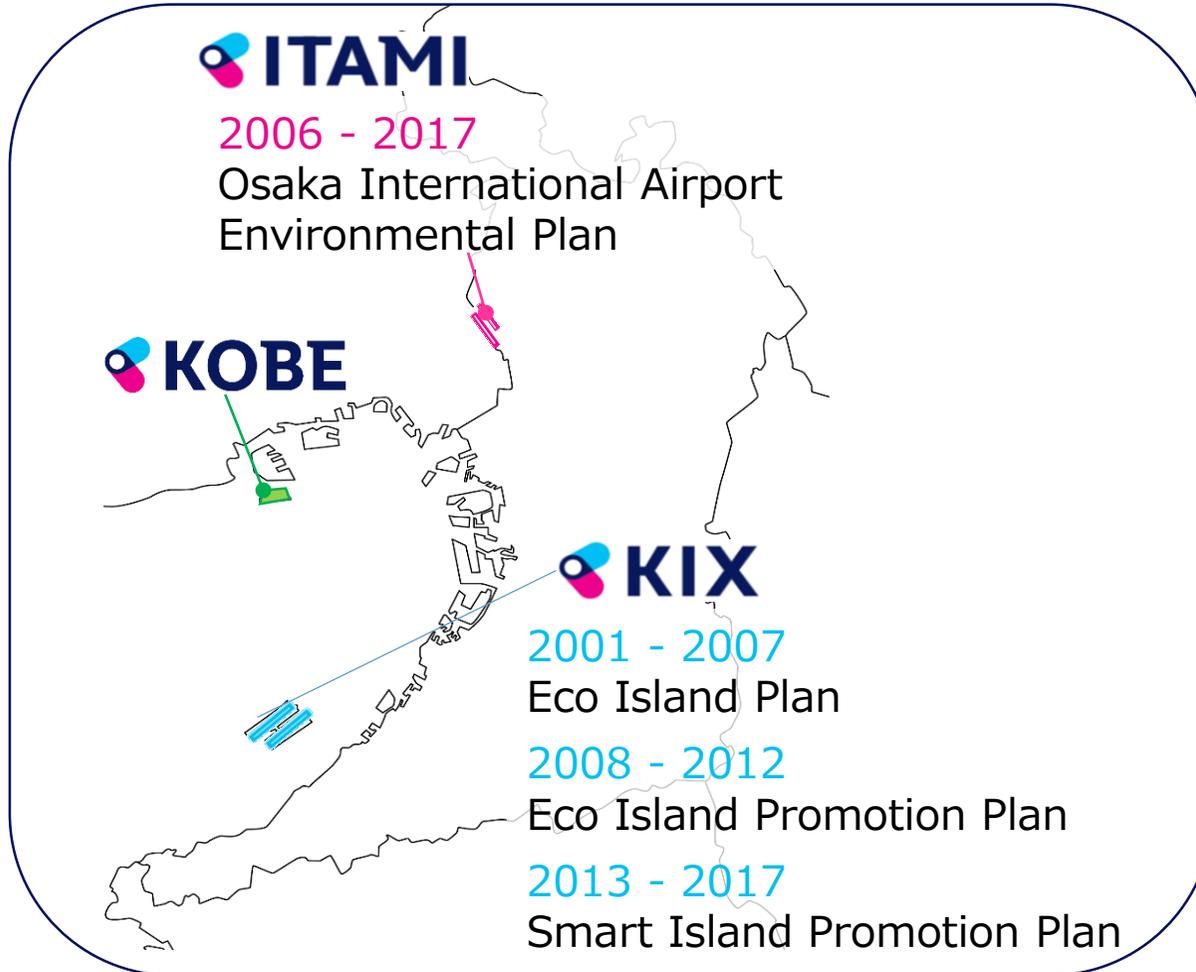

Shaping a New Journey

**KANSAI
AIRPORTS**

History of Environmental Plans

2018 - 2022

**New 5-year
Environmental Plan**

Basic Policy of New 5-year Environmental Plan

Vision

Eco Friendly Smart Airport

Response to climate change

Resource usage

Harmonious coexistence

Environmental management

Promotion strategies

- Promote energy conservation
- Reduce GHG emissions

- Reduce clean water consumption
- Recycle waste

- Monitor local environment
- Preserve biodiversity

- Utilize evaluation programs
- Cooperation & education

Strategic goals

- Cut energy consumption by 5%
- Reduce CO₂ emissions by 5%

- Reduce clean water consumption by 10%
- Achieve 35% waste recycling rate

- Measure environmental parameters
- Increase biodiversity

- Obtain environmental certification
- Establish management system

Strategic tasks

- ✓ Conserve energy
- ✓ Maintain and upgrade ACA
- ✓ Promote zero carbon footprint

- ✓ Utilize rain water and recycled water
- ✓ Promote waste segregation and recycling

- ✓ Monitor aircraft noise
- ✓ Secure air and water quality
- ✓ Protect wildlife habitat

- ✓ Distribute environmental information
- ✓ Leverage accreditation programs
- ✓ Cooperate with business partners
