

Hydrogen station to open at ITAMI - Enhanced convenience for FCV users -

Kansai Airports today announced that a hydrogen refueling station will open at Osaka International Airport (ITAMI) on April 9, 2019.

Having developed *One Eco-Airport Plan* – a five-year environment plan from FY2018 to FY2022, the company actively promotes clean energy solutions, including hydrogen, setting reduction of greenhouse gas emissions as one of its priorities as stated in the *Kansai Airports Environment Declaration*.

The new refueling station will be operated by Iwatani Corporation, a company running a number of hydrogen stations across the country with an aim to create a hydrogen society.

Along with the hydrogen station at Kansai International Airport (KIX), the new hydrogen station at ITAMI is expected to greatly enhance the convenience for fuel cell vehicle users in the area around the airport as well as the travel between the airport and KIX.

Kansai Airports Group is committed to pursuing environment-friendly practices in cooperation with partner operators while closely communicating with local communities to develop a harmonious airport environment.

[Outline of Hydrogen Station]

KIX ITAMI KOBE

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport (“KIX”) and Osaka International Airport (“ITAMI”) from New Kansai International Airport Company (“NKIAC”) and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports’ wholly-owned subsidiary, took over the operations of Kobe Airport (“KOBE”) from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of “One Kansai Airports Group”, Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.
