

## ITAMI to become Japan's first major airport with groundwater treatment facility

Adding new water supply line to strengthen disaster preparedness

Kansai Airports is delighted to announce that a new groundwater treatment facility at Osaka International Airport (ITAMI) will start up on February 28, 2020, helping ITAMI secure a water supply source in times of crisis.

Water extracted from groundwater wells will be purified by the facility's water treatment system including biofiltration equipment and reverse osmosis membranes. In normal times, the purified water will then be used in the airport's facilities along with the water supply from the local municipality. And in the event that the municipal water supply is cut off due to a disaster, the facility will provide not only a reliable lifeline for the airport but also emergency drinking water to residents in the surrounding communities. With this new facility, ITAMI will become the first major airport in Japan to use groundwater to meet passengers' drinking water needs.

Promoting harmony with local communities, Kansai Airports is committed to securing a safe journey and environment for all airport guests.

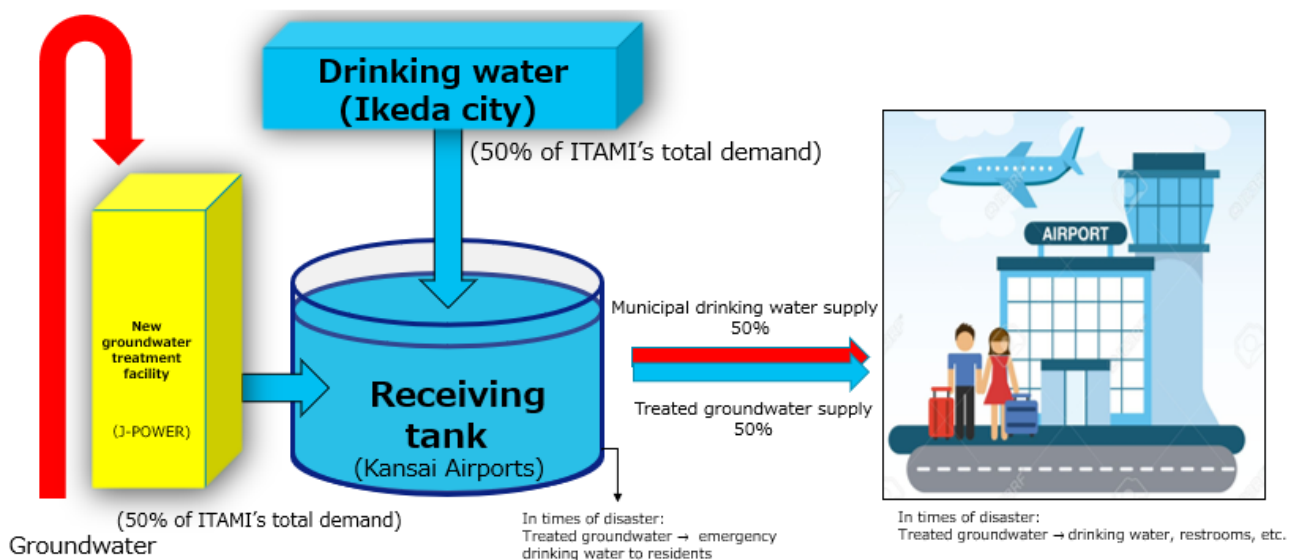

Scheduled operation start date: Friday, February 28, 2020

Supply volume: 150,000 m<sup>3</sup> per year

Operator: Electric Power Development Co., Ltd. (J-POWER)

(Headquarters: 6-15-1, Ginza, Chuo-cu, Tokyo)

**KANSAI AIRPORTS**

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport (“KIX”) and Osaka International Airport (“ITAMI”) from New Kansai International Airport Company (“NKIAC”) and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports’ wholly-owned subsidiary, took over the operations of Kobe Airport (“KOBE”) from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of “One Kansai Airports Group”, Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.
