

KIX to hold disaster drill to prepare for typhoon season, using DIMS to test transmission of information

Kansai Airports today announced that it will carry out an annual disaster drill at Kansai International Airport (KIX) on June 25, 2021 to prepare for the coming typhoon season.

This year, the drill will simulate a scenario in which a typhoon hits the airport amid the pandemic. Assuming that transportation disruptions have stranded passengers overnight, the drill participants will test the procedures for quickly setting up a registration desk for the stranded and providing Customers with information through multiple media including the Display Integrated Management System (DIMS*) put in place in March 2021.

By raising employees' awareness of disaster preparedness and refining response guidelines through the drill, the airport will ensure safe operations.

Kansai Airports will continue to make every effort to provide a safe airport environment for all passengers.

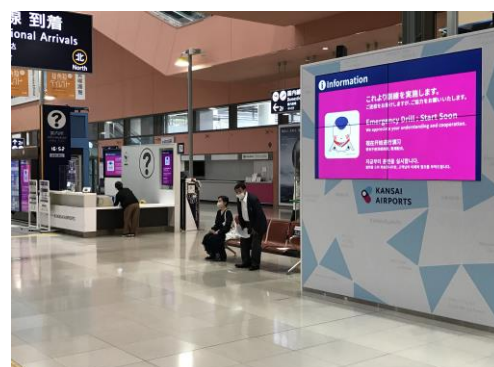

* DIMS is a system which integrates and manages the information on in-terminal digital signage. At KIX, under the concept of *A Shift from Manual Guidance to System-based Guidance*, about 900 DIMS-linked monitors are placed across the terminal building, consolidating various sorts of information and supporting effective communication to customers. In the event of a disaster and other emergency situations, DIMS works in conjunction with the emergency broadcasting system to display warning messages. At the same time, KIX Operation Center, serving as an information hub, centrally controls the monitors and delivers emergency information. KIX has become the first airport in Japan to introduce the large-scale display integrated system.

Drill outline

- Date: Friday, June 25, 2021 from 15:00 to 15:40
- Locations:
- In front of the temporary reception counter for new T1 Operation Center (Level 2, Terminal 1)

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport (“KIX”) and Osaka International Airport (“ITAMI”) from New Kansai International Airport Company (“NKIAC”) and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports’ wholly-owned subsidiary, took over the operations of Kobe Airport (“KOBE”) from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of “One Kansai Airports Group”, Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.
