

## PCR Test Clinic to open at KIX More testing options to be available at the airport

Kansai Airports today announced that PCR Test Clinic will open at Kansai International Airport (KIX) on December 13, 2021.

The new clinic will offer PCR tests as well as antigen and antibody tests for travelers departing on international flights. It will be the second location at KIX where passengers can take a PCR test. By providing various COVID-19 testing options and expanding the airport's testing capabilities, the clinic is expected to contribute to safe and secure air travel and the recovery of passenger demand at the airport.

Kansai Airports Group will continue to make every effort to provide a safe airport environment for all passengers.
