

## “Self-service leftover money exchanger” debut at KIX! Turn leftover foreign currency into electric money

Kansai Airports announces that a new money exchange service will be available on Tuesday, October 3, 2017. Self-service Pocket Change machines, which will be installed in Kansai International Airport (KIX) and operated by Pocket Change Inc., convert leftover foreign bills and coins into e-money, gift codes or coupons.

Last year KIX welcomed about 19 million international passengers (up 11% YOY), hitting a record high since its opening. About two-thirds of them are inbound tourists. The new service will enable departing inbound travelers to readily exchange their leftover cash for e-money of their own currencies at the airport.

At KIX foreign travelers are currently using their leftover travel money at facilities or service counters such as banks, foreign currency exchange counters, food & beverage or retail shops, or capsule vending machine Gacha. The new service, to be added to these facilities, will further expand travelers' choices in using Japanese coins at the airport. Similarly, returning Japanese tourists can use this kiosk for their foreign leftover cash conversion.

Kansai Airports will continue to create a comfortable and pleasant travel experience for airport users through exciting services.
