

**The first airport in Japan! Conduct trials for centralized inspection
New initiatives for enhancement of safety and security and
improvement of the workplace environment for security inspectors.**

Kansai Airports announced that it will conduct Japan's first trial of centralized inspection with X-ray inspection images at International Security Checkpoint in Kansai International Airport (KIX), Terminal 1 starting on May 17, 2022.

During the trial period, all levels of security inspections will be maintained and x-ray image inspections will be performed by inspectors allocated in the dedicated control room where image are displayed and analyzed. This allows those inspectors to perform their duties in a more focused environment without worrying about surrounding noise or human movement. Kansai Airports has been working to make security inspections more effective and efficient with less waiting time, while at the same time improving the environment for security inspectors.

Kansai Airports Group will proactively conduct demonstration experiment to introduce cutting-edge technology in earnest, and will strive to improve the convenience of the airports and provide a new safe, secure, and comfortable travel experience.

- Start date: May 17, 2022
- Location: Departure Gate 1, International Departure Floor, Level 4, Terminal 1
(*This service will be conducted at Departure Gate 1 among Departure Gates 1 through 3.)
