Proof of concept of an aircraft security system at KIX

- For aircraft security with higher efficiency and fewer personnel -

Kansai Airports is pleased to announce that Kansai Airports and its partner SECOM will carry out a proof of concept of an aircraft security system with surveillance cameras at Kansai International Airport (KIX) from December 18, 2023.

Aircraft security is to deter unauthorized intervention to a parked aircraft by a suspicious person. The security system in this proof of concept will employ a combination of a remote monitoring system using surveillance cameras and on-site response, with AI analysis technology as an additional function for video surveillance. This system allows aircraft security to be more sophisticated and efficient with the need for fewer human resources.

Kansai Airports Group will continue to actively engage itself with proof of concept to introduce cutting-edge technologies to further enhance the convenience of the airports and to provide safe, secure, comfortable and new travel experiences.

Aircraft security image

If a surveillance operator detects an irregularity, it is communicated to the staff on the premises with a siren or announcement.

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport ("KIX") and Osaka International Airport ("ITAMI") from New Kansai International Airport Company ("NKIAC") and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports' wholly-owned subsidiary, took over the operations of Kobe Airport ("KOBE") from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of "One Kansai Airports Group", Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.
