

ITAMI to install the largest number of EV chargers in Japan Contributing to an energy sustainable society

Kansai Airports is delighted to announce that 184 EV charging outlets will be installed in the North Parking Structure 1 and South Parking Structure at Osaka International Airport (ITAMI). The demand for EV chargers is expected to be even stronger.

Currently, the existing charging facility consists of two quick EV chargers, limiting the availability of the charging stations. With this large-scale installation, we will have the largest* EV charging facilities of any airport in Japan.

This project is eligible for the subsidy program provided by the Ministry of Economy, Trade and Industry to support the increase of charging facilities set as part of the “Subsidies for Promoting the Introduction of Clean Energy Vehicles and Infrastructure”. The service is scheduled to start in early 2024.

Kansai Airports Group will keep proactively adopting initiatives to reduce environmental impact and contribute to realizing a sustainable society.

*Survey by Ubiden, Inc. as of June 1, 2023

Overview

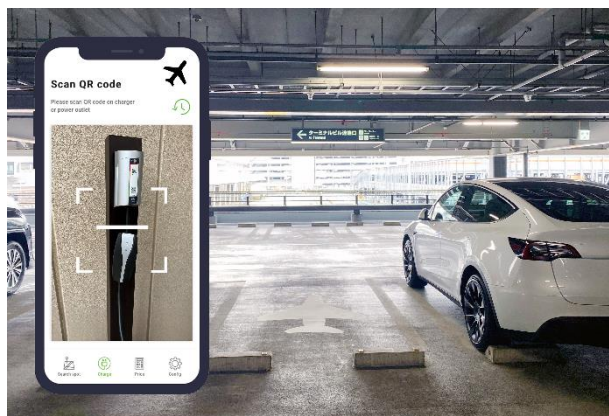

Location	3F North Parking Structure 1 84 lots for reservation	2F South Parking Structure 100 lots for reservation
Charger	3kW charging outlets for EV 200V	3kW charging outlets for EV 200V
Units	84 units	100 units

*The 3kW outlet for EV charging requires a 200V compatible charging cable.

*Please make a reservation for the use.

About WeCharge; EV charging service

WeCharge is an EV charging service provided by Ubiden, Inc. (Headquarter: Minato-ku, Tokyo, CEO & Co-Founder: Norio Yamaguchi). With a dedicated mobile application, users can easily register and make payments with a smartphone. This service is currently being expanded to condominiums, apartments, and buildings throughout Japan. The most significant feature of this service is that EVs can be charged wherever WeCharge is available, whether at hotels or commercial facilities.
