

Leftover clean water from aircraft to be utilized for firefighter training
- saving 1,000 cubic meters of clean water per year -

Kansai Airports in cooperation with KONOIKE Group K Ground Service Co., Ltd. and K Ground Expert Co., Ltd. announces that from October 2, 2023, water that has been discarded from flights arriving at Kansai International Airport will be used as firefighting water.

Aircraft need to carry clean water for toilets, hand-washing and dish-washing onboard. At the end of a flight, the unused water is discarded and the tanks are refilled to guarantee the perfect hygiene of the water. This initiative aims to utilize this remaining clean water for the training of firefighters at KIX. This initiative can save up to 1,000 cubic meters of clean water per year. Kansai Airports Group will continue to contribute to the realization of a sustainable society by promoting initiatives for decarbonization, circular economy, and an environmental symbiosis.

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport ("KIX") and Osaka International Airport ("ITAMI") from New Kansai International Airport Company ("NKIAC") and has been operating the two airports since April 1, 2016.

Kansai Airports Kobe, Kansai Airports' wholly-owned subsidiary, took over the operations of Kobe Airport ("KOBE") from Kobe City and started its business as an operating company on April 1, 2018.

Under the concept of "One Kansai Airports Group", Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.
